

- GreatScott!
  - DIY electronics and some product reviews
  - Also has electronics basics videos
  - Probably the best electronics youtuber on this list
- AddOhms
  - Mostly electronics basics videos
  - Not really active uploading, but streams about every week
- Afrotechmods
  - Electronics basics
  - Not active
- ElectroBOOM
  - Slightly more advanced topics
  - Likes to shock himself for views
  - Also has some electronics basics
- Evan Kale
  - Mostly a crazy guy doing DIY stuff
- Paul McWhorter
  - Arduino tutorials, recommended if you like someone explaining every single line of code
  - Kind of slow and long videos because he explains everything
- EEVblog
  - Takes apart complex equipment and goes through some of it, but not really beginner friendly
  - Has some op-amp videos that are pretty useful
- ALL ABOUT ELECTRONICS
  - Name says it all
- Ben Eater
  - Makes some complicated digital logic circuits on breadboards and explains how they work
  - Videos are kinda long
